

CS600 Rotary Vane Compressor Lubricant

CS600 is a polyalphaolefin/ester blend specifically formulated for Rotary Vane Compressors. This is an extended-life lubricant for use in vane compressors operating under harsh service conditions with high compression temperatures. CS600 is known for its extremely low volatility, outstanding low temperature properties, excellent corrosion protection and oxidative stability. CS600 has a service life rating of 4,000 hours and has excellent wear characteristics.

CS600 is made from the highest quality base stocks coupled with state-of-the-art additive technology resulting in performance improvements beyond mineral oil and other synthetic air compressor lubricants.

Using this lubricant allows customers to take advantage of **hydrovane's** five year air end Performance Warranty Plan for Rotary Vane Compressors.

CS600 has exceptional thermal stability and superior demulsibility among other outstanding benefits.

CS300 Rotary Vane Compressor Lubricant

CS300 is a diester based lubricant, the standard lubricant in **hydrovane** Rotary Vane Compressors, except the RS compressor at 150 psi units. CS300 offers superior condensate separation and performs over a wide temperature range.

Consult your local distributor for complete technical information on **hydrovane** Lubricants.

Complete Accessories Program

- Filters and Dryers
- Cooling Systems
- Heat Recovery
- Condensate Management
- Air Receivers
- Multi-Set Controllers
- Lubricants

Value Added Services

- Air Audit
- Performance Reporting
- Utility Air
- Performance Contracting

Complete Service for Compressed Air Technology

- Engineering of Complete Compressor Stations
- Local Service Centers
- Guaranteed Parts Availability
